

## Special Issue

# Zeolite: From a Boiling Stone to the Applicable Minerals in Various Industrial Processes, 3rd Edition

### Message from the Guest Editors

The first and second editions of our Special Issue on zeolites were a great success, showcasing the latest research on these fascinating minerals. We are pleased to announce a third edition that will continue exploring the diverse and expanding applications of zeolites. This third edition Special Issue in *Minerals* provides another opportunity to share recent scientific advances in zeolite research. We invite original research and review articles covering topics such as the following:

- Zeolite formation and occurrence;
- New methods for zeolite synthesis and characterization;
- Functionalization and modification of zeolite surfaces for special purpose;
- Applications in environmental protection, including wastewater treatment and air purification;
- Use of zeolites in catalysis, photocatalysis and petrochemistry;
- Agricultural and pharmaceutical applications;
- Zeolites as components in novel materials.

We look forward to receiving your contributions and continuing this important discussion.

---

### Guest Editors

Prof. Dr. Nevenka Rajić

Faculty of Ecology and Environmental Protection, The University Union–Nikola Tesla, 11158 Beograd, Serbia

Dr. Jelena Pavlović

Institute of Soil Science, Teodora Drajzera 7, 11000 Belgrade, Serbia

## About the Journal

### Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
